REVOLUTIONARY

COMPARE MODELS

MULTI-TASK. MULTI-PURPOSE. MULTILIFT.

The Multilift XR series represents a revolutionary breakthrough in hooklift technology. This unique, pioneering concept is based on a sliding hook mechanism, innovative new single-plate sub-frame and asymmetric lifting frame designs. The result is a product that delivers outstanding performance with fast, easy body mount and dismount functions.

And that’s not all. The XR range also brings you unrivalled reliability and safety plus smooth, efficient, trouble-free operation, perfect for any job site collection or delivery. All Multilift systems are maintenance-free with intelligent electronic in-cab controls.

Multilift XR series hooklifts are available in seven capacity ranges and all have a range of models to accommodate any length or lifting weight and vehicle type, from single to tandem, tri-axle, tandem-tandem and tri-drive.

No matter which XR model you choose, you know you’ll be getting the strongest, top performing, best engineered and most reliable truck-mounted hooklift in the world.

CANADA’S BEST SELLING HOOKLIFT – FOR A LOT OF GOOD REASONS

Multilift introduced the concept of Interchanging truck bodies to make them work harder in the 1940s. Since then, the designs have been simplified and the range of available sizes expanded to make Multilift hooklifts lighter, stronger, safer and better than ever.

Not only does the Multilift save you money in day to day operation, but also over time. Its incredible reliability and long life expectancy let you get the most out of your investment. That’s the new smart way of doing business.

These reasons have made Multilift the best-selling hook lift in Canada. And with the highest resale value.

MODEL	CAPACITY	BODY LENGTH FOR DUMPING (ft)	STANDARD HOOK HT (in)	TYPICAL TRUCK GVW (lbs)	TYPICAL CAB-AXLE (CONVENTIONAL CAB) (in)	TYPICAL MAX CHASSIS Height (in)

POWER

STANDARD FEATURES THAT TAKE THE LOAD OFF

Multilift hooklifts are the strongest and lightest hooklifts on the market. That means a maximum payload on your truck.

- Advanced hydraulic + control systems allow easy one person, in-cab operation
- Lightweight construction of high-tensile steel + tipping cylinders offer greater payload, increased stability + extended equipment life
- Large, durable shafts + sealed bearings require minimal service
- Hydraulic frame + rear body locks secure loads for safe, easy dumping + transport
- Load holding valves on all cylinders ensure safe operation and protect against broken hoses
- Optional hydraulic body locks + automatic locking hook

SINGLE AXLE SOLUTIONS

THE XR5 and XR7 models are our top sellers for single axle trucks – strong units that don't eat into precious available payloads. Available with an assortment of usable body lengths, Multilift can turn your truck into a perfect and complete compliment to your business.

THE XR10 1 AXLE OR 2

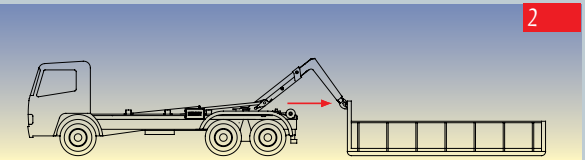

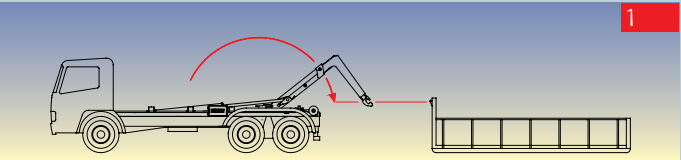

THE XR10's twin booster cylinders combined with a 62" hook height are the perfect pairing of capacity and truck size. Whether on a single axle to keep the truck maneuverable or on a tandem to maximize payload, you can be sure the XR10's 22,000 lbs capacity will get the job done.

AT A GLANCE

XR16

POWER X2

TANDEM AXLE SOLUTIONS

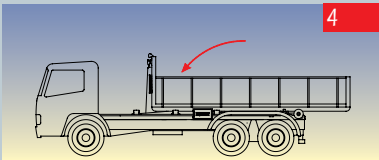

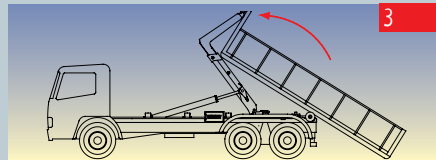

THE XR14 and XR16 are tandem truck hooklift systems that up the ante when the XR10's capacity isn't enough. With a capacity of 35,000 and 40,000 lbs respectively, and a choice of mechanical or hydraulic body locks, you can be sure you'll have all the strength and power you'll need.

Want more? Speed up your job with optional Quick Dumping and Quick Tipping and Quick Lowering. And Multilift's radio control option can make an easy job even easier.

POWER X3

TRI-AXLE, TRI-DRIVE, OR TANDEM-TANDEM SOLUTIONS

THE XR21, XR26 and XR30 Multilift systems bring a new realm of power. With capacities of 50,000, 60,000 and 72,000 lbs respectively, they have a seemingly unlimited supply of power and are a perfect balance of efficiency and brawn. All three models come standard with patented friction relief and auto-sequence operation.

Hydraulic body locks and PLC electronic fingertip controls come standard also and are complimented by many options unavailable on any other brand. Optional Quick Dumping and Quick Tipping make your deliveries even faster, while Quick Lowering helps you get more done in a day. Want to make your job easier still? Add optional radio control.
