

CANADA'S #1 TRUCK-MOUNTED HOOKLIFTS

**ML-TRUCK
EQUIPMENT**

Because quality matters.

ONE TRUCK. ONE MULTILIFT.
ONE OPERATOR.
#JOB DONE

MULTILIFT

#1 IN CANADA

MULTI-TASK. MULTI-PURPOSE. MULTILIFT.

MULTILIFT truck-mounted hooklift systems are more than powerful lifters. They are multi-task, multi-purpose and virtually indestructible – built to always perform – fast, precisely and efficiently, and last a lifetime.

Multilift XR, OPTIMA and ULTIMA hooklift models easily provide smooth, efficient, trouble-free operation and unrivalled reliability. They use the most advanced, proprietary, smart technology to provide bigger payloads, greater productivity and durability, and safety that exceeds expectations. Body mount and dismount functions are fast and easy, and so is operation.

More uptime. More productivity. More profits. Multilift hooklifts set the bar high as the Canadian Industry Standard.

CANADA'S BEST-SELLING TRUCK-MOUNTED HOOKLIFT

Multilift pioneered Interchangeable truck bodies in the 1940s. Today's Multilifts have a refined design that is lighter, stronger, safer and better than ever, and available in an expansive range of sizes and capacities.

Not only does the Multilift save you money in day to day operation, but also over time. Its incredible reliability and long life expectancy provide tangible value. Multilifts are the best-selling hooklifts in Canada – with the highest resale value.

STANDARD FEATURES THAT LET YOU DO MORE IN A DAY

MULTILIFT hooklifts are the lightest, strongest hooklifts on the market, maximizing payloads and extending equipment life. Advanced hydraulics and control systems, and easily interchangeable bodies enable one operator and one truck to do the work of a fleet. They are virtually maintenance-free, make minimal noise, can reduce emissions by up to 25% during active operation and use less engine time for the same amount of work, so you do more in a day.

All Multilift models feature Multilift's revolutionary hook mechanisms, innovative single-plate sub-frame, asymmetric lifting frame, intelligent electronic in-cab controls, large durable shafts and sealed bearings, a hydraulic frame, load -holding valves on all cylinders and rear body locks for secure loads and safe, easy dumping and transport.

Individual models come with an array of available options to boost your productivity even more.

MULTILIFT

SINGLE-AXLE SOLUTIONS

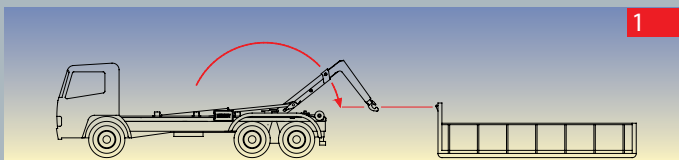

Multilift XR series single-axle hooklifts come in 14+ models with capacities from 11,000 to 22,000+ lbs. (to 10,000 kg). They fit any vehicle type from 19,500 to 30,000 + GVW and body lengths from 10.5 to 20 ft., have a low operating radius and 50-degree tipping angle.

XR10 options include Auto Sequence Control (ASC), FastSpeed™, FastTipping™, and FrictionRelief™ for quieter, smoother operation, frictionless body change and increased life.

	CAPACITY	HOOK HGT	TRUCK GVW
XR5	12,000 lb.	36"	19,500 + lb.
XR7	16,000 lb.	36"	24,000 lb.
XR10	22,000 lb.	62"	30,000+ lb.

XR5, XR7 and XR8 Multilifts are available in 'S' (short), 'N' (normal), 'L' (long) and XL (extra-long) models. They are our top-selling single-axle-truck models – strong units that don't eat into precious payload space. They fit interchangeable body lengths from 10.5 to 17 ft.

XR10 models' twin booster cylinders, 62" hook height and 22,000 lb. (10,000 kg) payload are the perfect pairing of capacity and truck size. They feature tipping locks, and an ergonomic Programmable Logic Controller (PLC) and make single-axle trucks easily maneuverable and can maximize payload on tandem trucks. makes every job faster and easier. Job done.

OPTIMA

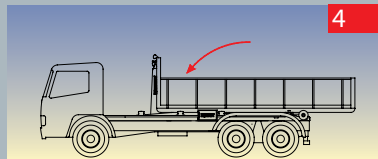

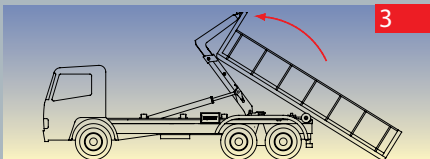

SERIES

2-, 3- and 4-AXLE SOLUTIONS FOR REPETITIVE TASKS

Cost-effective, high-quality, Multilift OPTIMA models reliably perform straightforward, routine tasks over and over. Four-functions control capacities of 15, 20 and 25-tonnes – an optimal choice for waste and recycling, moving scrap metal or construction materials, or general transportation.

OPTIMA hooklifts have one of the fastest unloading and tipping functions. Two, 3- and 4-axle trucks can carry more payload without compromising strength or safety.

	CAPACITY	HOOK HGT	TRUCK GVW
OPT15S	30,000 lb.	47/52"	?? + lb.
OPT20S	40,000 lb.	46/59"	26,000 lb.
OPT25S	50,000 lb.	46/63"	?? + lb.

INNOVATIVE SLIDING HOOK MECHANISM
MAKES MOUNTING AND DISMOUNTING
FAST AND SAFE IN FOUR EASY STEPS.

ULTIMA

SERIES

TANDEM-AXLE SOLUTIONS MORE POWER.

	CAPACITY	HOOK HGT	TRUCK GVW
ULT14	35,000 lb.	54/62"	52,000 + lb.
ULT16	37,500 to 40,000 lb.	54/62"	52,000 + lb.
ULT18	42,500 to 45,000 lb.	54/62"	52,000 + lb.
ULT21	50,000	62"	52,000 + lb.
ULT26	57,000 to 60,000 lb.	62"	60,000 to 86,000 lb.
ULT30	70,000 to 70,000 +	62"	TBD

The Multilift ULTIMA Power range hooklifts fit tri-axle and tandem-axle trucks. They come in 25+ models with capacities from 32,500 to 70,000+ lbs. (to 31,752 kg). They fit any vehicle type from 52,000 + to 70,000 + GVW and more, body lengths from 15 to 20 ft., and feature a 50-degree tipping angle.

Multilift ULTIMA (ULT) models offer additional standard and optional features include an integrated weighing system that calculates weight during loading. HookliftAssist™ – a camera-guided control – adds incredible functionality. SafePositioning™ safely and automatically slides containers into position based on length. Automatic load-based speed maximizes productivity without compromising safety. And a FutureTouch™ display gives you one-finger access to diagnostics, load, indication, and weight info.

The ULTIMA PERFORMANCE PACKAGE (standard on the ULT30) ramps up productivity and profit even more with Automatic Sequence Controls (ASC), SafeSpeed™, FastSpeed™, FastLowering™ and FastTipping™, which tips your load three times faster. It also reduces diesel consumption by up to 25 percent thanks to energy-efficient hydraulics.

MORE CAPACITY. MORE OPTIONS.

ULT14, ULT16 and ULT18 Multilifts up the power ante. With capacities from 32,500 to 42,500 lbs. and a choice of mechanical or hydraulic body locks, you can be sure you'll have all the strength and power you'll need.

ULT 21, ULT 26 and ULT 30 models bring a new realm of power for tri-axle, tri-drive and tandem trucks. With capacities of 50,000, 60,000 and 72,000 lbs., respectively, they have a seemingly unlimited power supply and are a perfect balance of efficiency and brawn. These models come standard with patented friction relief, auto-sequence operation, hydraulic body locks and PLC electronic fingertip controls.

MULTILIFT ULTIMA 28Z

The Multilift 28Z is a more versatile alternative to a dump truck and is perfect for transporting liquids, fragile cargo, trailers and machinery or servicing railways and loading docks. It can handle a range of container lengths – even short containers. Its tilting and sliding 'Z' system, low 49° tipping angle and minimized height make it easy to load and unload indoors or in height-restricted areas and help keep loose material in check.

MULTILIFT

+ ML-TRUCK EQUIPMENT

It's always a win-win

When you invest in any Multilift Hooklift, you're getting the experience and expertise of the world's #1 truck-mounted hooklift manufacturer, and its commitment to the best in hooklift design, engineering, performance + reliability.

You also get the support, experience, skilled expertise and broad coverage ML-Truck Equipment and Masonlift across BC, and of Atlas Polar's national sales and service network—exclusive distributors for Multilift, HIAB and Moffett equipment – and serving Canadian businesses for over 85 years.
